

## **Advantages of a membership in EUREL**

Status: November 2017

EUREL is the Convention of National Associations of Electrical Engineers of Europe. It was founded in Switzerland in 1972 and today it comprises ten national associations in ten countries in Greater Europe. Its aims and objectives are to facilitate the exchange of information and to foster a wider dissemination of scientific, technical and related knowledge relevant to electrical engineering. In this way EUREL contributes to the advancement of scientific and technical knowledge for the future benefit of both the profession and the public it serves.

### Advantages for Associations

1. EUREL encourages and supports the cooperation between member associations.
2. EUREL emphasizes the importance of science and technology and promotes engineering.
3. EUREL's member associations are part of a network of multiple national associations of electrical engineers in Greater Europe.
4. EUREL is committed to foster and assist the next generation of engineers in the field of electrotechnologies.
5. Whenever conferences are planned, member associations mutually invite other member associations to sponsor and/or to participate in this event.
6. EUREL also supports the organisation of quality conferences by its member associations, e.g. by informing other member associations or placing the information on the EUREL website.
7. The General Secretariat supports and assists member associations to get in contact with relevant stakeholder in the European Commission and the European Parliament.
8. Member associations also have access to the facilities of the General Secretariat's office in Brussels. They have the possibility to use a fully equipped workspace for the time of their stay in Brussels.

Advantages for individual members of member associations

1. Individual members may use certain facilities of other EUREL member associations such as libraries, conference rooms etc. at the same conditions as apply to the members of the host member association.
2. Publications of a particular member association can be subscribed to at a special price by the members of another member association (postage extra).
3. Individual members of member associations enjoy the same rights and privileges for all national and international meetings, seminars, colloquia etc. as the members of a host member association organising such events.
4. Individual members may collaborate in working groups or task forces on certain topics or exchange experiences, views and information in the EUREL network.
5. EUREL runs and supports different activities and programmes to help create a network among students and young professionals as there are
  - EUREL Young Engineers Seminar in Brussels
  - EUREL International Management Cup
  - EUREL field trips

These events enable young professionals and students to come together to discuss research and innovation in their sectors.

6. EUREL provides individual members with support and assistance regarding the contact to other member associations.
7. Most importantly, individual members of a EUREL member association are part of an international community of engineering and technology professionals with the chance to participate in a professional network.
